

## Website Structure

### Information Architecture

For this website design we will use a tree like structure, using horizontal bar near the top of the page taking up the right two thirds of the page.

### Interaction Design (UXD)

The user will be brought back to the home page by clicking on the ‘Home’ icon on the navigation bar.

Each Menu heading will have some sort of roll over to confirm that clicking that area has an action.

Each navigation button will be highlighted when mouse is hovered over each link.

On mobile devices the hamburger icon will not be used as some users may not know what it does.

The “subscription” information to each artist will be at the top of each.

It will bring up a pop-up with a simple form that asks for their Firstname, Surname, Email address, Query. They will also have the option to fill in a date and concert location as additional query information.

We will include that their email won’t be passed onto any third party and that we follow the

current GDPR legislation.
